

CERTIFIED WITH CONFIDENCE

WaterMark certification, in conjunction with AS 3497:2021, is the benchmark for safety, compliance, and performance of water filters in Australia. It ensures that any certified system has been rigorously tested, is safe for drinking water use, and is legally approved for installation within the Australian plumbing framework.

ISO 9001:2015 certification demonstrates that an organisation has a robust and internationally recognised quality management system, ensuring consistent delivery, improved efficiency, and a strong focus on customer satisfaction

ISO 14001:2015 certification shows that an organisation has a structured and internationally recognised system for managing environmental impact, supporting sustainability, regulatory compliance, and continuous environmental improvement.

ISO 45001:2018 certification demonstrates that an organisation has a robust and internationally recognised system for managing workplace health and safety, helping to protect employees, reduce risks, and continuously improve safety performance.

ISO/IEC 17025 accreditation confirms that a laboratory is technically competent and operates to internationally recognised standards, ensuring its testing and calibration results are accurate, reliable, and trusted worldwide.

NSF/ANSI testing and certification provide independent assurance that water treatment products are safe, reliable, and effective, giving consumers confidence that the system delivers proven performance and protects drinking water quality.

Halal certification confirms that a product is permissible under Islamic law, having met strict requirements for ingredients, processing, and handling, while ensuring cleanliness, safety, and integrity throughout the supply chain.

Kosher certification confirms that a product meets strict Jewish dietary laws, ensuring that its ingredients, processing, and handling comply with recognised standards for purity, preparation, and consumption.
